Review of article by **Fontham et al., 1994,** Multicenter study on lung cancer in nonsmoking women.

Dear Richard:

Please find below the review of the article by Fontham et al. you requested in London on June 7, 1994. My colleagues at INBIFO have significantly contributed to this review. As proposed by Matt Winokur I have kept the review itself as short as possible but enclosed some "supplementary information" for those, who want more information on the paper itself or on its context.

Please let me know, if you have further questions to the article.

Best regards,

Roger
